

Bubble-ology

**Do you find bubbles fascinating?
Always wanting to know how things work?
Are you in grades 1-4?**

***Then come to the lab and experiment...
with BUBBLES!***

"Bubble-ology" After School Enrichment

Come and explore the mystery of bubbles. Students will have good, clean fun as they perform scientific lab work while developing and using the skills of predicting, observing, testing, and drawing conclusions. They will explore surface tension, bubble shapes, colors on bubbles, and bubble strength and lift. Various bubble solutions and bubble-making devices will be tested and evaluated. As a culmination, scientists will create and "teach" during a "Bubble Festival" for family and friends.

Grasshopper Enrichment Education classes are designed to engage the student with fun, challenging, and motivational instruction. Students actively participate in hands-on, real world, creative activities where they develop skills, make inquiries, and broaden their thinking. Each student will walk away from the experience with newly acquired life skills and a passion fulfilled.

Wellington Elementary

Wednesdays

Grades 1-4

1:50-3:05

4/26-6/14

\$140 per student

Online registration opens

April 14
